KAUFMANN Bleach

Bleach- Disinfectant-Detergent-Softener

Product Data Sheet

Application

Kaufmann Bleach is an unique formulation with eucalyptus fragrance which exhibits the following properties:

1. bleaching/stain removal on fabrics when diluted 20ml in 1 litre of water .for machine washing use 100ml.
2. for disinfecting toilet bowls and drains dilute 1:1 with water or use in the concentrated form. Kaufmann Bleach kills most known germs., viz. yeast's, moulds and bacteria. Most other disinfectants eliminate yeast's and moulds but are not as successful on bacteria, especially gram negative bacteria.
3. when diluted 30ml in 1 litre of water, hard surfaces such as floors, walls, tiles, baths, table tops etc. can be cleaned and sterilised due to the introduction of powerful soaps in the formulation.

Kaufmann Bleach is also ACT 29 registered as it kills 99.99% of most common germs in the household. Always remember, as with any chemicals, to use gloves when working with chemicals.

Directions for use

1. Bleaching: Apply to stains directly if present on white fabrics or dilute in a container for soaking. Dilute according to personal requirements. Do not use Kaufmann Bleach on any coloured fabrics as it contains Sodium hypochlorite which neutralises and removes colours.
2. Disinfecting of surfaces: you may dilute or apply directly to the surface depending on personal requirements or application. Kaufmann Bleach is ideal for removing mild stains from common surfaces when applying and letting it stand and rinsing directly after.

Physical Properties

Appearance:	Pale yellow clear liquid
Specific gravity:	1,06- 1,08
% Sodium hypochlorite	5,3 - 5,5 % m/v when packed

Packaging

Kaufmann Bleach is available in 750ml, 2 litre, 5 litre and 25 litre pack sizes.
