## Quattro 500 Water-Based Degreaser Product Data Sheet

### Application

A powerful and very economical environmentally friendly water-based detergent and degreaser for use on cement, concrete, workshop floors, kitchens (as well as an effective oven cleaner) and abattoirs where cleanliness and hygiene is of utmost importance. Animal/vegetable fats and oils, as well as petroleum based oils and greases are very effectively removed from all types of surfaces. Quattro 500 is also effective on floors that suffer from acid contamination. The product not only cleans but also neutralises the acid contaminants, which renders the rinse off solution more acceptable in the effluent sewerage system.

### Dosage & Directions of use

For general cleaning dilute up to 1 to 10 to 20 parts of Quattro 500 with water. If contamination is particularly high, use concentrated or dilute up to 1 to 3 parts with water. Apply concentrated or diluted Quattro 500 onto contaminated surface and allow to stand for 5 to 10 minutes. Brushing with a broom is optional depending on the level of contamination. However Quattro 500 does not normally require additional brushing to produce a very clean surface free from oils and greases. Some brushing will assist in accelerating the cleaning process.

### Safety and Handling

Avoid prolonged contact of the concentrated product with the skin. If prolonged, contact is unavoidable, wear gloves and protective clothing if necessary. Eye irritant: wear safety goggles. In case of skin or eye contact with the concentrated product, rinse with copious amounts of water. Seek medical attention immediately.

### Physical Properties

Appearance:	Clear Pink Liquid
Specific Gravity:	1,015 - 1,017
pH (10% Solution)	9 – 11
Flammability	Non Flammable

### Packaging

Quattro 500 is available in 1Lt Trigger Packs, 5Lt, 5Lt Trigger Packs, 25Lt and 210Lt packaging.
