## Spring Valley Liquid Hand Soap Product Data Sheet

### Application

Spring Valley Liquid Hand Soap is an unique concentrated pearly formulation for washing hands. With many advantages, it contains a balanced blend of skin conditioners leaving the hands clean, very smooth and soft to the touch.

The product is available in two very long lasting fragrances, wild rose and valley silk. The concentrated formulation ensures excellent cleaning, even in workshop environments, from oils (mineral/vegetable) and greases.

Spring Valley Liquid Hand Soap also contains an anti-bacterial agent, viz. 4-chloro-3-methylphenol (cmp), which is highly effective against e-coli and pseudomonas bacteria present in human faeces. This anti-bacterial agent has also a broad spectrum of anti-microbial activity, and is equally effective against bacteria, mould fungi and yeast's. Sulphate -reducing bacteria such as desulfovibrio desulfuricans and formaldehyde-resistant bacteria are particularly sensitive to cmp. Spring valley liquid hand soap is therefore ideal for use in hospitals, restaurants and major hotel groups to avoid possible hand contamination.

### Directions for use

Dispense one squirt into hands for the perfect quantity for one wash. Add some tap water and rub hands together to create a soft pearly lather. Rinse hands with clean tap water once hands are satisfactorily clean. If hands are heavily soiled, a second wash may be done before towel-drying or air-blowing hands.

### Physical Properties

<b>Appearance:</b>	Rose	Pink Pearly Liquid
	Silk	Creamy Pearly Liquid
<b>Specific Gravity:</b>	1,01 - 1,03	
<b>pH</b>	7,0 - 8,0
